Jumping Castles

All jumping castles must be approved by Cumberland Council prior to the date of the booking. A detailed sketch indicating the proposed location of the jumping castles must be submitted with the application form.

Council does not supply power for jumping castles, amusement devices, catering equipment or amplified sound equipment. Hirer’s are required to have their own power generators.

Specific Conditions

1. All jumping castles operators are required to have public liability insurance cover of at least $10 million per claim for the intended hire period

2. All jumping castles must be designed and constructed in accordance with Australian Standard 3533, 1-1997

3. While in use, each jumping castle must be supervised by a responsible person at least 18 years old and trained in all aspects of its safe operation

4. Jumping castles must not be operated in periods when wind velocity exceeds 45km/hr. If the wind velocity approaches this level, the device must be cleared and deflated immediately

5. While in use, each jumping castle must be securely restrained in accordance with the manufacturer’s recommendations

6. If any part of the restraining system fails the device must be cleared and if necessary deflated until the restraining system can be made secure again

7. All jumping castles must have a minimum setback of 10 metres from any playground, picnic shelter or eating area
