# Auburn Botanic Gardens Entrance

---

The Auburn Botanic Gardens Master Plan identified that the entries to the gardens required redesigning to reflect their importance and improve the arrival experiences of the community to the gardens.

The Auburn Botanic Gardens is listed on the Heritage Register as “local landscape of significance” Part of the project identified the timber pergola as being of high significance and the timber pergola structure was to be disassembled and restored with existing and new materials as part of this project.

The project consisted of the construction of a new community access point with landscaping. Upgrades also include up lighting, irrigation, and landscaping.

# Mona Street & Walters Street Roundabout

---

Safety improvements completed at the intersection, for vehicular and pedestrian traffic, with new roundabout construction including new pram ramps, minor concrete footpath reconstruction.

# Eve Street Footpath, Guildford

---

Footpath construction involved the installation of new concrete footpath to provide safe, off-road pedestrian access.

Pedestrian link to existing path network and passive open space.
