Customer Independence

Cumberland City Council's Seniors & Disability Services ensures the independence of customers is supported, fostered, and encouraged through service delivery.

Cumberland City Council Seniors and Disability Services supports and operates under the Person-Centred Approach. This terminology defines the way our services operate and the philosophy and practices it undertakes. By stating Council's Seniors and Disability supports the person-centred approach, we are stating that the person is at the centre of the service planning and delivery. There is a focus on the individual's strengths, needs, interests and goals to ensure they remain an active participant in their community.

Our services work with the individual, carer, and family to form a personal plan.

Customer Wellness And Reablement

Our approach involves assessment, planning and delivery of supports that builds on the strength and capacity of our customers and promote a level of independence in daily living tasks, as well as reducing risks to living safely at home.

Reablement is a person-centred practice and wellness approach. It's our strategy towards addressing a specific barrier to the customer's independence.

Our services work with each individual to form a personal plan stating their goals and what supports they will require to achieve them.

Our intake officer will discuss your individual goals and support needs. They will then develop a goal plan detailing how you want us to provide our service or give you the care to ensure our services are completely customized to your individual needs.

During the length of our service provision, you will be supported to exercise your rights to make informed decisions and choices about the individual services you receive, the activities you would like to participate in and the lifestyle you wish to experience/ live.

Duty of care will be considered when supporting customers to make decisions to take risks.

An informed decision can then be made once the customer has all the relevant available information about the options and the risks involved. Seniors & Disability Services Team staff members will support, and respect informed decisions made by customers

Informed Decision Making

As part of our person-centred care every customer will be supported to develop a goal plan. Each of those "goal plans" will be different reflecting the individuals own objectives, interests, and preferences. These are normally developed 3 months after service commencement to allow you to "test drive" our services and determine how you specifically wish for us to support you and most importantly what you want to achieve.

Funding

Council's Seniors and Disability Services receive funding from the Commonwealth Government to assist people over 65 (50 years and over for Aboriginal & Torres Strait Islander people).

The funding is to assist people that are older and frail, adults with disability and their carers to remain independent and living at home thereby preventing premature admission to a nursing home or other residential care.

The National Disability Insurance scheme provides funding to people with disability aged 18 to 65, their family and carers. It is jointly governed and funded by the Australian, and participating state and territory governments.

Eligibility

Eligibility for our services is based on your support needs and age. If you're having trouble with everyday tasks and feel that a little support could improve your health and wellbeing, some of our programs could be right for you.

Council's Seniors and Disability Services Team offers a variety of community-based services for the frail aged, active seniors and CALD community aged 55 + (50+ for Aboriginal and Torres Strait Islander service users) and adults aged between 18 and 65 years who have a moderate, severe or profound functional and permanent disability.

PEOPLE WITH DIVERSE NEEDS

Where customers may have diverse needs, the Seniors and Disability Team will ensure that all correspondence will be provided in an appropriate suitable format.

CONFIDENTIALITY OF COMPLAINTS AND DISPUTES

As far as possible, the fact that a customer has lodged a complaint and the details of that complaint are kept confidential amongst staff directly concerned with its resolution. The customer's permission is obtained prior to any information being given to other parties that it may be desirable to involve in order to satisfactory resolve the complaint or dispute.

Monitoring Complaints and Customer Feedback

We truly value and appreciate how our customers feel about all our services. All complaints and customer feedback processes and systems are regularly audited as part of our audit program. All customers are encouraged to provide ongoing feedback on issues and areas where improvements can be made.
