1.0 INTRODUCTION.

This is a Plan of Management for Community Land along Duck River.

1.1 What is “Community” Land?

All land owned by or under the control of Council (known as Public Land) is classified as either “Community” Land or “Operational” Land. This is a requirement of the Local Government Act, 1993. Under the Local Government Act, 1993, a road or land to which the Crown Lands Act, 1989 applies, is not public land.

The essential difference between the two classifications is that Community Land is subject to restrictions as to how Council may lease or sell the land. Operational land is not subject to such restrictions. Community Land is primarily made up of Council’s open space areas.

Chapter 6 of the Local Government Act, 1993 regulates Community Land. Community Land is required to be used and managed in accordance with a Plan of Management applying to that land.

1.2 What is a Plan of Management?

The Local Government Act, 1993 also requires Councils to prepare Plans of Management, in consultation with the community, for all Community Land. Plans of Management are essential tools which identify the important features of the land, clarifies how Council intends to manage the land and identifies how the land may be used or developed.

Council has prepared a number of Plans of Management to cater for its Community Land. These include Plans of Management for Parks (small parks and playgrounds and larger parks), Sportsgrounds and General Community Use areas. These Plans of Management are known as generic plans, because they each refer to a type of Community Land serving a specific function.

Plans of Management have also been prepared for land identified as comprising the habitat of threatened/vulnerable species/population/community such as Peter Hislop Park, Auburn Golf Course. Further, a specific Plan of Management has also been prepared for the Auburn Botanic Gardens because it contains threatened/vulnerable species/population/community. The Auburn Botanic Gardens also require unique strategies to manage this regional facility.

In addition, this geographic Plan of Management has been prepared for the Duck River Foreshore, because it relates to a common geographic feature, Duck River.

1.3 What is the Purpose of this Plan of Management?

The purpose of this plan is to provide a management structure for Council's Duck River Foreshore areas. This structure is to reflect the needs and views of the users of these areas, as well as those of Council's staff who are responsible for managing these areas. This Plan of Management also provides a framework to develop a balanced response to future pressures.

1.4 Land Covered by This Plan of Management.

This Plan of Management applies to land listed in Table 1 and shown on Map 1.

The Duck River Foreshore is a unique extensive recreational resource and an important environmental asset. It provides several values and benefits to the community and contribute towards the aesthetic appearance of the Auburn Local Government Area (located at the juxtaposition of the inner/middle and outer western suburbs of Sydney - approximately 20 kilometres west of the Sydney Central Business District).

The long stretch of the Duck River Foreshore serve predominantly local and regional needs. Its primary function is a floodplain however, it provides valuable flora and fauna habitat and accommodates a variety of recreation activities including picnicking, casual walking and organised sporting activities.

Facilities provided along the Foreshore include Auburn's cycle/walk way network which follows the Duck River, access bridges, barbeque areas, amenities and playground and sporting facilities. A list of Community Land with playground equipment is in Appendix 2. The Foreshore is further enhanced by the existence of trees for shade.

Despite its attributes, parts of the Duck River and Foreshore are under used and in poor condition. The location of the Duck River catchment across four Local Government Areas (Auburn, Holroyd, Bankstown and Parramatta) means that the management of the Duck River and its Foreshore require a high degree of co-ordination between government and community groups.

The Foreshore is a critical area within the broader Duck River catchment. It is in this area that much can be done to improve the environmental quality and significance of Duck River.

1.5 Land Ownership and Restrictions to the Use of the Land.

The property description and ownership details of Duck River Foreshore covered by this Plan of Management is provided in Appendix 1.

Auburn City Council does not own all the land covered under this Plan of Management. There are some Crown Lands within the Auburn Local Government Area under the care and control of Council and some land that are privately owned or owned by other public authorities.

Under the Local Government Act, 1993, Council is not obliged to prepare Plans of Management for land to which the Crown Lands Act, 1989 applies.

Certain Crown Lands and private land not owned by a public authority are included in this Plan of Management for Council's management purposes (See Appendix 1). The provisions of Chapter 6 in regard to Community Land, of the Local Government Act, 1993 do not apply to these lands.

The property titles of land not owned by Council are included in Appendix 1. Some of the land not owned by Council are subject to trust, estate, interest, conditions, dedications, restrictions or covenants imposed by the owner. This Plan of Management does not contain any provisions inconsistent with these trusts, estate, interest, dedication, condition and or restriction. Further, the Plan of Management does not contain any provisions that override any provisions, trusts, estate, interest, dedication, condition and or restriction imposed by the owner.

1.6 What is the Land Category?

The Local Government Act, 1993, requires Community Land to be categorised as one or more of the following:

- (a) a natural area;
- (b) a sportsground;
- (c) a park;
- (d) an area of cultural significance;
- (e) general community use.

The Local Government Act, 1993 requires that Community Land that is categorised as Natural Area is to be further categorised as one or more of the following.

- (a) bushland;
- (b) wetland;
- (c) escarpment;
- (d) watercourse;
- (e) foreshore;
- (f) a category prescribed by the regulations to the Act.

This Plan of Management applies to land classified “Community” under the categories of Park, Sportsgrounds and General Community Use. All of the land has been categorised in other Plans of Management. This Plan of Management applies to land along Duck River Foreshore and provides additional management strategies.

A list of all the Community Land and their categories are provided in Part A – General Information.

1.7 Authorised Activities.

In accordance with the Local Government Act 1993, the following are authorised by this Plan of Management:

- a) Leases, and licences or granting of estates.

The Local Government Act, 1993 requires any leases and licences or granting of estates of community land to be authorised by a Plan of Management.

This Plan of Management expressly authorise Council to enter into a lease or licence with any person or organisation or entity for the use or occupation of part of or the whole of the subject land affected by this Plan of Management. The lease or licence or estate may be granted for any purpose that is consistent or ancillary to the objectives of the Plan of Management and in compliance with Chapter 6 of the Local Government Act, 1993. (See Appendix 3 for extracts from the Local Government Act, 1993).

Leases and licences or granting of estates, are to be granted in accordance with the requirements of the Local Government Act 1993 as amended, as prescribed in the Local Government Regulations and in accordance with any leasing, licensing and or hire policy or plan adopted by Auburn City Council. (A copy of Council's Policy for Leasing or Hire of Council's Sporting and Recreational Facilities is provided in Appendix 3).

Community Land cannot be leased or licensed or any other estate granted over the land for more than twenty-one (21) years. Leases and Licences for more than five (5) years are allowed after community consultation.

- b) Use or hire of the site with the consent of Council.

Council may grant consent to use or hire of the site in accordance with the objectives of this Plan of Management, the requirements of the Local Government Act 1993 as amended, as prescribed in the Local Government General Regulations and in accordance with any leasing, Licensing and or hire policy or plan adopted by Auburn City Council.

Use of the site should also be consistent with the provisions of any environmental planning instrument, deemed environmental planning instrument or development control plan adopted by Auburn City Council and the Environmental Planning and Assessment Act, 1979, as amended.

- c) Development of Community Land with the consent of Council.

Development of Community Land and construction of buildings, structures and facilities are to be consistent with the objectives of this Plan of Management and the provisions of any environmental planning instrument, deemed environmental planning instrument or development control plan adopted by Auburn City Council.

Development of Community Land should also be consistent with the requirements of the Environmental Planning and Assessment Act, 1979, as amended.

Section 47E of Chapter 6 of the Local Government Act, 1993, as amended, makes provisions relating to development of Community Land. (See Appendix 3 for extracts from the Local Government Act, 1993).

Council will consider the preparation of a Plan of Management to address development proposals that have the potential to significantly affect the environment and or cause interference to the existing and future amenity of adjoining occupations, surrounding areas and or the neighbourhood in general.

d) Use of Land for drainage purposes.

Provision of drainage easements in favour of upstream properties, subject to the following conditions:

- the easement is situated to the park's boundaries;
- appropriate compensation is sought for the easement burdening the park;
- the drainage easement shall not interfere with the use of the park;
- the stormwater pipe within the easement shall have a 1 in 100 year capacity;
- the stormwater pipe within the easement shall be constructed to Council's standards and specifications;
- all costs associated with the creation of the drainage easement shall be borne by the applicant; and
- the drainage easement shall be granted at the discretion of Council.

e) Construction and or dedication as public road in accordance with the objectives of this Plan of Management and with Council consent.

The Local Government Act, 1993 requires that Community Land may not be dedicated as a public road under the Roads Act, 1993 (See Appendix 3 for extracts from the Local Government Act, 1993) unless :

- i) the road is necessary to facilitate enjoyment of the area of Community Land on which the road is to be constructed or any facility on that land, and
- ii) Council has considered means of access other than public road access to facilitate that enjoyment, and
- iii) there is a Plan of Management applying to the land concerned and provision of a public road is expressly authorised by the Plan of Management.

The following are exempt from the above provision:

- i) dedication of land for the purpose of widening an existing public road, or

- ii) dedication of land for the purpose of other road works of minor character authorised by the Plan of Management applying to the land, in respect of existing roads or roads, or
 - iii) dedication of land for the purpose of a road that is subject to an order under Division 1 of Part 5 of the Roads Act, 1993.
- f) Fees and Charges.

Fees and charges shall be in accordance with the fees and charges specified in Council's annual Management Plan. Net proceeds should be used towards the general purpose and management of the Duck River Foreshore.
- g) Any activity which is consistent with the objectives of this Plan of Management, the Local Government Act, 1993, Environmental Planning and Assessment Act, 1979, deemed environmental planning instrument, environmental planning instrument and development control plan or policy adopted by Auburn City Council.

2.0 MANAGEMENT STRATEGIES.

2.1 Objectives.

This Plan of Management establishes general management objectives and issues which will be used as a guide for design and future management of the Duck River Foreshore.

The objectives are:

- (a) To conserve biodiversity and maintain ecosystem function of Duck River and Foreshore.
- (b) To maintain Duck River and Foreshore in its natural state and setting.
- (c) To provide for the restoration and regeneration of the Duck River and Foreshore.
- (d) To provide for community use of and access to Duck River and Foreshore areas in such a manner as will minimise and mitigate any disturbance caused by human intrusion.
- (e) To assist in and facilitate the implementation of any provisions restricting the use and management of the Duck River Foreshore that are set out in a recovery plan or threat abatement plan prepared under the Threatened Species Conservation Act 1995 or the Fisheries Management Act, 1994.
- (f) To ensure the ongoing ecological viability of the Duck River and Foreshore areas by protecting the ecological biodiversity and habitat values of the land, the flora and fauna (including invertebrates, fungi and micro-organisms) and other ecological values of the land.
- (g) To protect the aesthetic, heritage, recreational, educational and scientific values of the Duck River and Foreshore.
- (h) To promote the management of the Duck River and Foreshore in a manner that protects and enhances the values and quality and facilitates public enjoyment of the land and to implement measures directed to minimising or mitigating any disturbance caused by human intrusion.
- (i) To restore degraded bushland.
- (j) To protect existing landforms such as natural drainage lines, Duck River and Foreshores.
- (k) To retain bushland in parcels of a size and configuration that will enable the existing plant and animal communities to survive in the long term.
- (l) To protect bushland as a natural stabiliser of the soil surface.

- (m) To maintain the Foreshore as a transition area between the aquatic and the terrestrial environment and to protect and enhance all functions associated with the Foreshore's role as a transition area.
- (n) To facilitate the ecologically sustainable use of the Foreshore and to mitigate impact on the Foreshore by community use.
- (o) To provide for a variety of open space that recognises the environmental quality of Duck River and that is accessible to all members of the community.
- (p) To protect native and endangered species and their habitats and control introduced species in accordance with the National Parks and Wildlife Act and any other relevant Act.

The means by which Council proposes to achieve the objectives and performance targets and the manner of assessing its performance in respect to the objectives and performance targets, are detailed in Table 2 of this Plan of Management. A list of issues for management of the Duck River Foreshore have been identified and are listed.

Regular review of the management strategies should be undertaken to ensure their relevance and consistency with changing community expectations and budgetary constraints.

TABLE 2 - MANAGEMENT STRATEGIES

Management Issue	Objectives & Performance Targets	Means of Achievement	Manner of Assessment	Responsibility
<ul style="list-style-type: none"> Community Awareness, Education and Involvement. 	<ul style="list-style-type: none"> To ensure community awareness of the Duck River and Foreshore.
