Auburn Botanic Garden Entrance

Auburn Botanic Garden gets Grand Entrance

In 2018, Council undertook a Plan of Management for Auburn Botanic Gardens. We wanted to provide locals with an exciting and welcoming experience upon arrival to the Gardens, which is how the Auburn Botanic Gardens Entrance Treatment Program was born.

We're working on the Chisholm Road entrance to create a focal point that attracts visitors into the Gardens and enhances the landscape character of the site. Council is always looking for opportunities to preserve Auburn Botanic Garden's heritage and infrastructure.

The project was funded by the NSW Government Stronger Communities Fund and the Everyone Can Play Grant Programme.

Woodville Golf Course

Keeping the Greens Healthy at Woodville Golf Course

An automated irrigation system has been installed at the Woodville Golf Course.

Council is always working to deliver facilities to promote healthy lifestyles and support recreational activities, by ensuring infrastructure in public places is well-maintained and residents have green and open spaces they can enjoy.

The new, automatic irrigation system includes sprinklers, pipework, wiring and a pump house to irrigate all tees, greens and fairways. It also includes a weather station and central base system control.

Completed in May 2020, the project was funded by the Woodville Ward Reserve funds.
